Strychnine Killed

Caroline

Caroline Nadine Davis died of strychnine poisoning, Sonoma County Dist, Atty. John Hawkes announced today. The nude body of the 15

The nide body of the 15 year-old Shasta county girl was found July 31 down a steep embank ment off Franz Valley Road north of Santa Rosa within four feet of the spot where the skeletal remains of two Santa Rosa girls were found Dec. 28.

ta Rosa girls were found Dec. 28.
Officials are working on the theory that all three were slain by the same person.
The cause of the latest vic-

tim's death was withheld today in hopes the exact type of stricchaine used could be identified. Hawkes sald today the pathologist's report to him indicated this could not be done, beyond concluding the type of strychnine was either sulphate or

tablet form.

However, he said the autopsy indicated it could have been administered to the girl either orally or intravenously.

ministered to the girl either orally or intravenously.

Strychnine is sometimes used in the drug culture to mix with

in the drug culture to mix with other drugs, such as heroin or amphetamine, but Hawkes said there was no indication of those hind of drugs present in the victim's body.

Asked if there was evidence of any other drug indicated by the autopsy, Hawkes declined comment.

Caroline ran away from home Feb. § and has been traced as far away as Illinois and New Mexico. She was last seen arburdile where her grandmother left her in front of the post office to hitch a ride south an iol toward Modesto. She is believed

to have died around July 20.
